Decorative and functional - the NELSON outdoor light is the perfect choice for effective lighting on the patio, on the house façade or in the entrance area. The light source not only provides natural and atmospheric light diffusion, but also provides security when it gets dark. In combination with the weather-resistant die-cast aluminium in anthracite, the pathway light is ideal for illuminating your outdoor area. For energy-saving lighting, it is recommended to use an LED illuminant. These are an optimal alternative to conventional halogen lamps and stand for a high quality of light and energy savings of up to 80%. In addition, LED lamps help you benefit from a long service life, low heat generation and at the same time protect the environment.
